The **Port Huron Chess Club** meets Thursdays, except holidays, from 6:30-10:00 PM, at Palmer Park Recreation Center, 2829 Armour Street, (NE corner of Garfield Street and Gratiot Ave...1 mile North of the Blue Water Bridge) Port Huron, Michigan. Everyone is welcome. All equipment provided. Website: <http://porthuronchessclub.volasite.com>

Wingrove and Hartwig tie for Under 1700 April Quad!

Bill Wingrove

Nathan Hartwig

Gerrit Beneker and **Noel Bedy** kept the front runners humbled, clipping each of the section leaders for half a point in the final round of the first Under-1700 Quad hosted by the PHCC. Well on his way to an 1800+ USCF rating, **Nathan Hartwig** was heavily favored by the club's gaggle of crusty "second-guessers", but **Bill Wingrove** didn't "stink" enough to knock himself out of contention against the rapidly improving junior. Always teetering on the brink of disaster, Bill consistently challenged the "Fates and survived the "Furies" to finish without a loss. For his part, Nathan played solidly throughout the event not to be outdone by his "elder"!

Thanks has to go to **Gerrit Beneker** who graciously agreed to enter the event by volunteering his services for the remaining open slot in the quad. Although admitting his penchant for abstaining from tournament chess, he performed admirably, contributing some of the most provocative chess of the bunch.

After being upended by Bill (*Or, Charlie as he became affectionately known during the event.*), Noel settled down to complete a respectable 1.5 score in the three round event.

A Dutch Treat:

Games from the 2014 PHCC Championships

Stewart Wilkinson is a USCF-rated Postal Master, a former Port Huron Chess Club champion and a consistently top performer in many PHCC events. He is especially noted for his in-depth analyses, collegiality, knowledge of opening theory and familiarity with players in the Port Huron Chess Club.

Our 2014 PHCC Championships was full of surprises. Newcomer **Tony West** ended **Alan Gregg's** string of four consecutive titles (*Although Alan has yet to lose a single game in any of his five championship bids.- Ed.*) Everyone bought into Dave "The Bruiser" Boucher's story about his black eye. The venerable Ruy Lopez was absent from tournament play. The worst winter in recent memory couldn't halt play even though many intrepid members drove substantial distances to reach the PHCC. Perhaps the biggest surprise was the popularity of the Dutch Defense. Six of the thirty-four games played featured an early f5 for Black, making the Dutch Defense the opening most played in the 2014 PHCC Championships.

The Dutch Defense can be traced back to 1789 and Dutch analyst Elias Stern. The opening was rarely seen in master play for the next one hundred and fifty years, save occasional f5 forays by Alekhine and Nimzovich. To paraphrase GM Nick DeFirmian in **MCO** 2008, this lack of popularity can be attributed to the risk factor. The Dutch ensures an unbalanced, fighting game. However, Black compromises the safety of his King by countering White's queen pawn openings with an early f5.

The legendary Botvinnik proved this risk to be manageable in the 1930's. The Dutch Defense was an integral part of his opening repertoire throughout his championship years. Most theorists and grandmasters were still unimpressed. I recall analyses by GM Reshevsky in **Chess Life**, circa 1972, where he judged the Dutch to be inferior and unsuitable for grandmaster play.

For USCF postal play, I selected this unpopular opening to defend against 1.d4, 1.Nf3, or 1.c4 after studying the games of GM Artur Yusupov. There were two reasons for doing so: first, I could play 1....,e6 inviting the French Defense. If White declined the French with a move other than 2.e4, I could then play 2....,f5; second, Dutch theory was scarce in 1990. I hoped to avoid prepared variations and force my opponents "out of the book" early in the game. In fact, the only book on the Dutch Defense in the USCF catalog was a 1989 work by GM Larry Christensen.

Opening theory on the Dutch exploded in the 1990's. Due to the efforts of GMs Short, Dolmatov, Nikolic, Agdestein, Bareev and Lautier, the Dutch is a mainstream opening today. Devotees today included many Scandinavian masters; even Magnus Carlsen has been known to play the opening that once was considered too risky for championship play. Perhaps the recent popularity of the Dutch in the PHCC isn't that surprising!

The Dutch Defense features three different formations for Black. In the Leningrad System, Black fianchettoes his King Bishop, resulting in pawns at f5, g6 and d6. Oddly, this sharp variation was not played in our 2014 Championships. The Stonewall variation is defined by Black pawns at f5, e6, d5 and usually c6. Three games in the PHCC Championship Tournament featured this array by Black. The Ilyin-Zhenesky System, reminiscent of Botvinnik's strategy, presents a more flexible approach with pawns at f5, e6 and d6. This month we will analyze this system, utilizing the three games played by club members this winter. Next month we will review the Stonewall and Leningrad Variations.

These three games illustrate GM DeFirmian's two key themes of the Dutch Defense. By pushing f7-f5 Black gets a sharp game. By pushing f7-f5 Black weakens his K-side. Next month we will examine these themes as they apply to the Leningrad and Stonewall Dutch variations, by analyzing the games: Jones/Gregg, Jones/Rutkofske and Gregg/West. See You then!

Solution to What's the Best Move.

- A) Black chose 10....,e5?! After 11.ed5, Nd5 12.Ne4!, Bb6 White thought for about ten minutes before playing 13.Bc4! (During the game I considered the provocative 13.Nfg5!? but Fritz showed that Black can survive with 13....,h6 14.Nf7, Kf7 15.Qh5+,Kf8 16.Bh6.) The game continuation was 11.exd5 Nxd5 12.Ne4 Bb6 13.Bc4 Be6 14.Neg5 Nxc3 15.Qc2 Bxc4 16.Qxh7+ Kf8 17.bxc3 Be6 18.Ba3+ Ne7 19.Qh8# 1-0
- B) 10....,a5 is interesting. Black gains space, unafraid of the isolani resulting from the exchange at d5. White, however, can counter with 11.e5, Ng4 12.Re2 and stand slightly better.
- C) 10...., de4? 11.Ne4, Ne4 12.Be4, Qd1 13.Rd1 and Black's Q-side is paralyzed!
- D) 10....,Qb6 is a good move. 11.Qe2, Ng4 12. Rf1, Nce5 13.Ne5,, Ne5 14.Bc2, Bd7 15.Nh5!, Ng6 looks equal.
- E) The best move! An immediate 10....,Ng4 is annoying for White. 11.Rf1, Qc7 12.h3, Nge5 equalizes as White's development has been interrupted. 10....,Qb6 is strong but I prefer the Queen at c7.

PHCC Rating Lists

The following list represents only current members of the Port Huron Chess Club. Current USCF ratings were used for members that had them, in order to establish the initial club rating list. The USCF rating format is used as the basis for calculating our club rating list. Members that had no USCF ratings are given a provisional rating based on their performances against regular club members who had USCF ratings. Club rated events will use these ratings for pairing purposes.
